But beyond that, i'll keep my other comments for somewhere else. Recently picked up a 05 Yukon XL Denali, 178k miles, would be clean if it was cleaned more, but the seats are actually in fantastic condition when compared to just about any other GMT800 with these miles that i've seen. Going through the kinks on her, and getting her back into DD

Yukon XL with factory Bose system, steering wheel controls. Previous owner took the truck to some hack-job shop when installing an aftermarket radio, and they completely butchered the harness plug that goes into the back of the factory unit. I have searched high and low on the web, looking for the wire descriptions.

Yukon XL Denali - Recommendations for (close to plug and play) aftermarket stereo head unit? The Pac RP5-GM31 has a port for the rear DVD player. Is this the equivalent part of the maestro rr 2? Feb 25, 2024 #17 I want the system to be a bit more modern with stuff like carplay. So that unit plus an adapter plate will basically

It's located under dash just to the left of brake pedal. This gets power from locations 37 and 52 of the engine bay fuse panel. Check those too. It could very well be that the radio isn't programmed for the RSE option. When doing internet search I've seen this is a possibility. 2001 Yukon SLT 2012 Yukon Denali XL 2011 Yukon Denali RIP 5/20/18
