A lithium 1.5V battery is a primary (non-rechargeable) battery that utilizes lithium as its anode material. Lithium batteries are known for their superior energy density and longer shelf life, unlike traditional alkaline batteries, which use zinc and manganese dioxide.

However, lithium batteries have a voltage range from 1.5V to 3.0V per cell. Lithium batteries are better than other types of batteries for high-performance gadgets because of this voltage difference. Lithium batteries, due to their distinctive chemical composition, are more powerful than regular alkaline batteries.
