Renogy Solar Starter Kits feature a 10-year material and workmanship warranty on solar panels and a 2-year warranty on PWM charge controllers. to regulate current, and a battery to store the electrical power. You will need adapter kit cables to wire the solar panel(s) and charge controller, and tray cables connecting the charge controller

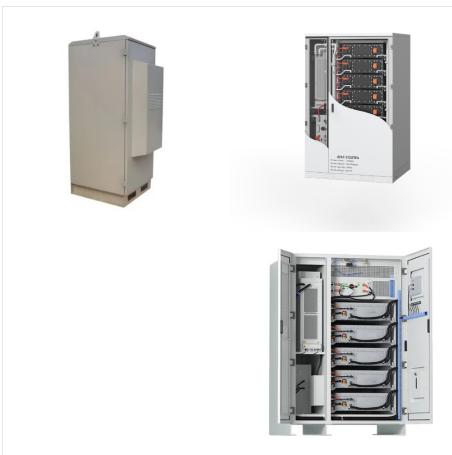

With a max input limit of 100V, the EPEVER 40A charge controller is ideal for use with small and medium size arrays. You can wire up to four 12V solar panels in series (12V solar panels usually exceed that voltage, hence the limit of 4).

If you were to get a 20A PWM controller, you would be able to regulate a solar panel bank of up to 320W for 12V batteries, and 640W for 24V batteries. The PWM controller can also be used to connect solar panels to a battery bank of 12V batteries, provided that the batteries are the same size and that they are in good condition.

A solar charge controller is connected between solar panels and batteries to ensure power from the panels reaches the battery safely and effectively. The battery feeds into an inverter that changes the DC power into AC to run appliances (aka "loads"). The four main functions of a solar charge controller are: Accept incoming power from solar panels

The REGO 12V 60A MPPT Solar Charge Controller focuses on the simplified installation and comprehensive protections for the whole solar system. Plug-and-play hookups for rapid connection, save on installation time than traditional controllers. Renogy 175W/200W Panel??? You can use the 12V 60A REGO MPPT Charge Controller to link your 175 Watt

The charge controller in your solar installation sits between the energy source (solar panels) and storage (batteries). Charge controllers prevent your batteries from being overcharged by limiting the amount and rate of charge to your batteries.

Usually these models can handle up to 2-3 12V solar panels wired in series. 100V-150V: This is the most popular PV voltage range for MPPT charge controllers. Models in this range can usually handle 3-6 12V solar panels wired in series. >150V: MPPTs in this range are designed for large solar arrays. They can usually handle 7 or more 12V solar
