That means 18V high-power tools and 10.8-volt tools. From a marketing standpoint, being able to put a higher number on the tool makes it seem more powerful. Putting a nominal voltage on it represents where the battery operates most of the time. For some reason, the 20V Max vs 18V debate only seems to be an issue among these 5 cell group platforms.

The DCB183 18V XR 2Ah battery is compatible with all 18V XR tools. Delivers the optimum runtime to weight ratio perfect for lighter and second fix applications and includes a built-in LED Fuel Gauge for instant charge status.

Join me as I rip into another two DeWalt lithium battery packs! DeWalt 20V Max 1.3Ah Battery (DCB207) At this point, I'm getting pretty familiar with the DeWalt 20V Max series. I"ve pulled apart the 3.0Ah pack, torn apart the new 20700 based 6.0Ah pack, and successfully fried an egg with the 6.0Ah pack.

The dual battery charger can charge both 20v and 60v FlexVolt batteries. The fan keeps things cool when charging as well. - IP55 rating against dust and water when used according to the instructions. -There's a USB-A port inside the case as well if you wanted to charge your phone internally.

Solar to charge the battery storage. Then rig up separately a storage battery to charger for tool battery. That's just me though. Have fun, if you have some success lmk. Edit: this would only potentially work for tool batteries that are 12v, if you"re at 18 or 24v you"d need to add a dc to dc power converter to match your tool battery voltage

## **18V DEWALT BATTERY SOLAR POWER**

The other approach is to add a buffer battery, and possibly a charge controller to protect that battery. This will let the DeWalt charger pull its instantaneous power from the battery even if that exceeds what the panels are producing at any given moment, but on average the panels will produce more than the DeWalt needs and the buffer battery

I was hoping to directly charge my big dewalt batteries from an mppt controller, rather than having to charge a 12v battery to run an inverter or automotive 18v dewalt charger. Someone in the post I made mentioned a hobbyist lithium charger, run directly off a 12v battery.
