

How to change the power steering fluid of your Town and Country? In short: Changing the power steering fluid is easy. To do so, you must make sure that your car is cold and its engine is off. Take into account that you should replace it only if there is a problem with the power steering system: for example, if it is making weird noises or it is hard to turn your car's wheels.

Per the manual, you should use Power Steering Fluid, and as I understand it, off the shelf fluid from your local parts store should suffice. The above said, when the power steering in our 1998 DGC Sport started getting a bit noisy, I extracted as much of the fluid from the system as I could and poured in ATF+4; the system quieted right down.

Chrysler Town & Country has 25 NHTSA complaints for the steering at 77,658 miles average. I believe their power steering system has been a component of their planned obsolescence for

2001 TOWN AND COUNTRY POWER STEERING SYSTEM

The best way to clean out power steering pipes is to have the power steering system flushed. This involves draining out the old power steering fluid and replacing it with new fluid. This cleans ???

Why does the power steering system of your Town and Country need fluids? Steering fluids pass on the force necessary to make the steering system turn. This force is created by the pump of the power steering system. You should always have the recommended fluid level because if the level is low, the pump may get damaged.
