2003 TOYOTA SOLARA POWER WINDOW FUSE

In the end, I did not end up buying a new window regulator assembly, but I think a "Dorman 741-356 Rear Driver Side Replacement Power Window Regulator with Motor for Toyota Camry" would work. They sell for about \$72 on Amazon .

The Power Windows / Locks should be controlled by a 30AMP Fuse (larger Square fuse) usually pink in color. Its behind the coin tray. You have to remove the Knee Bolster to access the fuse Edit: Here are a few pictures of where its located, and why you need to remove the knee bolster (The under dash surrounding held in by 10mm bolts)

Camry and Solara Forum. Camry & Solara Lounge Power Windows/Locks Fuse Location It looks like this is what the owners manual is referring to for the power window fuse. In the owners manual, these blocks correspond to 1) rear defogger 2) power windows, power locks, power moonroof 3) starting system (I think, not sure what this is

2003 TOYOTA SOLARA POWER WINDOW FUSE

2003 TOYOTA SOLARA POWER WINDOW FUSE

Toyota Solara mk1 ??? fuse box ??? engine compartment Engine compartment (vehicles with daytime running light system and 1MZ- FE engine with automatic transmission for California) Power window control system, power seat, electric moon roof: 45: AM1: 40: No circuit: Fuses (type C) Fuse: Ampere rating [A] Circuit: 45: ALT: 100 "RDI

The passenger window and rear windows stopped working on this convertible. Driver's window still works so doesn't seem to be the fuse (my understanding is that it is a single fuse for power windows). I have not been able to personally do additional diagnostics yet because my daughter has the car at college.

A lot of how-to window regulator/motor removal videos are demonstrated when the window is operable. It was tough to separate the window from the regulator while the window was in the full-upright position, and the motor was not retracting the window down. Luckily the 03 Solara coupe does not have a window frame on the door.

2003 TOYOTA SOLARA POWER WINDOW FUSE

A few possibilities, either the window regulator has broken, or the bracket that holds the glass at the bottom has come loose from the glass. The bracket can pull off the glass, especially with power windows when you're trying to lower the window and it is stuck from freezing or old glass runs that are trapping the window from moving.

Why does the air conditioning fuse blow in the Solara? The most common reasons for the air conditioning fuse blowing are: Short circuit: a short circuit in the wiring or components of the air conditioning system (such as the compressor, condenser fan, or cabin fan) can cause an excessive current flow that blows the fuse. Check for damaged or frayed wires that may be in ???
