customer: i have a 2009 venza, last time i turned on was about a month ago. the battery drained so i went and recharged the battery, know i have two lights on my dash board, they are *the check engine light the electric power steering system warning light, what can i do.

The National Highway Traffic Safety Administration (NHTSA) requires all models of cars and light trucks newer than 2008 to be equipped with a tire pressure sensor system. This law was enacted due to the high accident and mortality rate of cars and trucks with overinflated or underinflated tires being involved in tire blowouts or rollover accidents.
