adventure today! Features.

The time it takes to charge a 12-volt battery with a
200-watt solar panel depends on several factors,
including the battery capacity, the solar panel's
efficiency, the amount of sunlight available, and the
charging method used. Assuming you use a 12-volt
battery system, a 250-watt solar panel can produce
up to 20 amps of current per hour

This listing is for 250W solar panels. These are used panels. They have developed a cosmetic blemish known as a snail trail. This does not affect the output of the panel. Manufacturing labels have been removed. Panels have been tested and have good output. These would need to be for off-grid applications. Due to constantly changing stock, these panels may come with silver ???
