Its unique multi-module microinverters can be connected to two or four solar panels at a time, and even have an in-built MPPT (maximum power point tracking) controller for systems with energy storage. Some solar panel brands also offer AC modules, meaning they have microinverters integrated into the panels as default.

Hybrid inverters are efficient and allow for a streamlined design. However, they are becoming less common as more batteries are being sold with built-in inverters. Every home solar panel system needs inverters to operate.
