The pack, which has a class-leading energy density of 200 Wh/kg, is the result of a three-year joint development program between Kia Motors Corporation and SK Innovation in Korea. Engineers from Kia have developed the outstanding power pack featuring 192 lithium-ion polymer battery cells in eight modules, delivering a total power output of 27 kWh.

The EP401 is a battery pack module integrated charge-discharge machine designed based on the characteristics of lithium-ion batteries used in electrical vehicles. It can efficiently perform the charging, discharging, and balancing of battery pack modules, thereby enhancing the efficiency of battery pack maintenance.

The following master's thesis is concerned with the development of a 12V and 400V lithium-ion immersive cooled battery. Lithium-ion batteries must be explicitly designed for a Classic Mini Cooper. The design and manufacture of the 12V battery and the modelling of the 400V battery for heat generation and SOC curve are all part of this thesis
