solar products, solar system solutions and services to cus-tomers around the world. No. 1 module supplier for quality and performance/price ratio in IHS Module Customer Insight Survey. As a leading PV project developer and manufacturer of solar modules with over 40 GW deployed around the world since 2001.

For instance, a single home 450 watt solar panel in California will produce roughly 2.5 kWh per day. It's enough to run a stove for 1-3 hours or to keep a TV on for 24 hours. An American house needs around 30 kWh per day on average and around 900 kWh per month. A 5-6 kW solar system covers these needs.
