This portable desktop charger features a customized internal board and charging program to provide smooth operation.

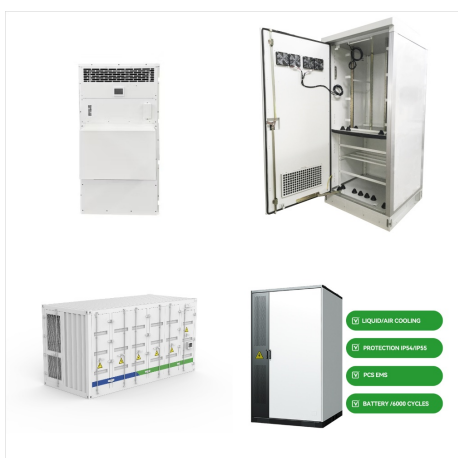

6 4 V LITHIUM ION BATTERY CHARGER

The recommended charging rate of an Li-Ion Cell is between 0.5C and 1C; the full charge period is approximately TWO TO THREE hours. In "1C", "C" refers to the AH or the mAH value of the battery, meaning if the Li-ion cell is rated at 2600mAH then the "C" value becomes 2600, or 2.6 Amps, which implies that it can be charged at its full 1C, or at 2.6 amps if required.

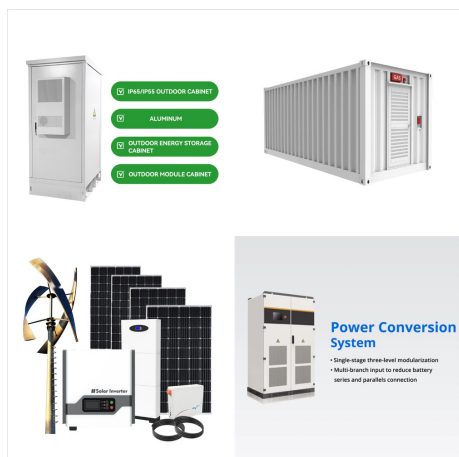

14.4 volt battery and 14.8 volt lithium ion battery pack 4S polymer; If you need 2S battery chargers, please contact with us. We can custom make the battery charger with related charging connector. li polymer 7.4 v battery can be widely used for different applications, like POS machine, portable media player, toy RC, other portable
