

When scrambling to shore up a storm-damaged water system, meter reading may be the last thing on a utility manager's mind. However, water utilities with the right kind of advanced metering infrastructure (AMI) in place have found that it ???

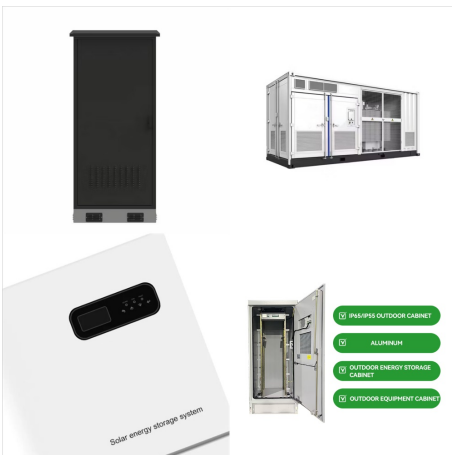

Customers with existing TWACS power-line communications system can extend their fixed network to gas and water meters by simply adding Badger ORION RF transmitters. Using this short-hop solution to collect total consumption data simplifies billing and allows better resource management. The system employs a radio-frequency link to transmit data

10 Reasons to Choose Power Line Communication For Your AMI Job; Hurricane Havoc: How Resilient AMI Systems Help Water Utilities Beat It; Hidden Leaks? DC Water Helps Customers Find Them; Our Top Picks. 4 Reasons to Attend AclaraConnect '22; How Much Can Leak Detection Reduce Non-Revenue Water Losses?

Get the scoop on what your customers expect, how satisfied they are with your services and how to best reach them in two insightful talks ??? one from Patty Durand, president of the Smart Grid Consumer Collaborative, and Andrew Heath, senior director utilities & infrastructure practice at J.D. Power.

How One Rural Electric Co-op Gets the Jump on Power Outages. Feb 18, 2019 | AclaraONE, Electric utilities, Fault detection and location, Power Line Communications. The dispersed population of most cooperatives presents unique challenges in servicing members.
