

Aeromine Technologies has developed a building integrated "wind turbine" for industrial/commercial use.

Aeromines have no visible rotating parts which make them ideal for root top installation as they make no noise and no vibrations. We help companies and organizations in their efforts to reduced CO2 emissions and convert to renewable energy.

How can aeromine help with decarbonization?

Aeromine combines local GIS data, expert knowledge on building performances, and proprietary tools to analyze regional wind resources. With this expertise, we can support your decarbonization journey through a systematic implementation across your portfolio. Copyright © Aeromine Technologies, 2020-2024.

Does aeromine have an inverter?

No inverter. The AC output of each Aeromine generator is easily integrated with your building and other energy assets. Aeromine systems can be remotely monitored and controlled, enabling individual units or full system operational changes as well as seamless integration with other building systems.

What makes aeromine unique?

Aeromine has been widely recognized for its innovative contribution to net-zero building operations.

How do aeromine airfoils work?

When wind passes through the airfoils, a low pressure is generated, drawing air up through the intake and internal generator. Aeromine units have no visible moving parts. They run quietly, require little maintenance, and have minimal impact on wildlife. The design avoids environmental unfriendly materials, such as silicon and rare earth magnets.

About Aeromine Technologies Aeromine Technologies has developed a breakthrough scalable renewable energy solution that harnesses the power of wind in an efficient system. Aeromine units install on

Designed by the company Aeromine Technologies, the unit doesn"t exactly look like your traditional wind turbine ??? no big blades in sight. Instead, it has a large central column and vertical

Aerogenerador sin aspas para utilizar en casa: el invento que revoluciona Espa?a. El aerogenerador sin aspas dom?stico del que hablamos es el modelo Aeromine, que cuenta con una potencia 16 veces mayor que la de una placa solar.Esta pieza de la marca Aeromine Technologies no tiene aspas y produce un 50% m?s de potencia que un panel solar tradicional.

Consciente du potentiel ?nerg?tique du vent, l"entreprise am?ricaine Aeromine a d?velopp? un g?n?rateur ?olien de toit qui serait plus productif que les panneaux solaires et les ?oliennes traditionnelles. Avec son design caract?ris? par un grand cylindre avec des ailes lat?rales ainsi qu"un profil a?rodynamique, le dispositif adopte une technologie brevet?e.

Aeromine Technologies a donc d?velopp? une solution int?ressante d"?nergie renouvelable qui exploite les effets du vent de mani?re optimale. Asarnow et son ?quipe visent ? transformer le secteur de l"?nergie, en apportant une solution ?olienne performante aux propri?taires de biens commerciaux et r?sidentiels, tout en respectant

City: Los Angeles Year founded: 2020 Total funding: \$3.2 million What it does: Aeromine produces rooftop devices for capturing wind energy. Why it's hot: Many companies are looking for ways to generate on-site renewable electricity to reduce their carbon footprints and find relief from high energy costs. Aeromine said its systems, which mount to the edge of flat-roof ???

The Aeromine technology does away with traditional wind turbine blades and instead uses a pair of vertically mounted airfoils (or wings). When air flows past the wings, an area of low pressure forms between them, and an aerodynamically shaped tower placed between the airfoils feeds the suction created by this low pressure through pipework so
