The expo???one of the largest annual gatherings of
 fruit and vegetable growers and farm marketers in
 North America???had more than 5,000 attendees,
 60% of whom work as fruit and vegetable farmers.
 The Israeli companies Agam Greenhouse Energy
 Systems, CropX, NESS Fertigation, Robotic
 Perception and TierraSpec were invited to present
 their

Agam Greenhouse Energy Systems Follow
 Following Location: Israel " Agam's Ventilated
 Latent Heat Converter (VLHC) is a revolutionary
 patented, field-tested dehumidification system for
 cold-climate greenhouses. It solves humidity-related
 problems, including yield-damaging botrytis, while
 actually reducing energy and fungicide expenses.

The system receives its energy supply out of the electricity system, as well as the heating system located in the greenhouse. Heating system must supply hot water at a temperature of 850 C, at capacity of 5 M3/h and at a pressure of 10 M head of water. Electrical current of 20A.

Agam2009,?????????? Agam,??????????

Agam Energy Systems Ltd is active in the area of energy conservation and environmental technologies. Based on more than 10 years know-how and experience in the field of heat exchange between air and hygroscopic brine, the company develops, manufactures and markets new and more efficient technologies and machines (all patented). The current products are ???

AGAM GREENHOUSE ENERGY SYSTEMS NORTH KOREA

Agam Greenhouse Energy Systems develops micro-climate energy-conserving, dehumidification, heating, and cooling systems for the agricultural, horticultural, and cannabis industries. The company's Ventilated Latent Heat Converter and Hybrid Air Condition are dehumidification systems for cold and warm climate greenhouses.
