

Who is Aleo Solar?

Aleo Solar is a company that has operated in the premium solar panel market for over 20 years. It is one of the few companies that manufactures solar panels solely in Europe. Most of its competitors have shifted solar panel production to countries across Asia.

Where are Aleo solar panels manufactured?

Aleo Solar panels are manufactured in Prenzlau, Germany. Since 2014, Aleo Solar GmbH has kept their focus on producing high quality solar panels with this sole manufacturing plant. The capacity of this plant is just under 500MW per year, making them a small-scale producer compared to the largest Chinese solar brands.

What types of solar panels does Aleo Solar offer?

Aleo Solar offers three main series of solar panels: HE-TEC, Elegante, and Roof integration. These series have a variety of different options to suit residential, commercial, and utility-scale projects. For the Australian market, Aleo Solar provides P23, X61, X63, and X83 premium series, and Sol S83 series for Building-Integrated Photovoltaic (BIPV) projects.

Are Aleo solar panels reliable?

Aleo Solar's panels are reported to have an outstanding performance in most PV module tests, including climate chamber tests, electroluminescence tests, and extreme weather resistance tests. Their performance is almost twice the minimum IEC standards for hail testing, making their panels more reliable and durable.

Does Aleo Solar offer a warranty?

Aleo Solar offers a warranty for its X83 series that is fairly typical. The X63 premium series comes with an improved degradation rate of less than 2% in the first year and 0.45% for the subsequent 24 years. However, a concerning part of the Australian warranty is that all claims must be made directly to their German office.

What is the maximum power output of Aleo Solar panels?

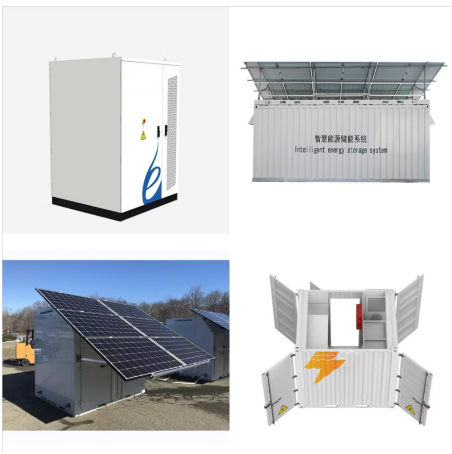

Aleo Solar panels have a maximum power output of up to 410Wp, with a guaranteed minimum of 85.12% of the nameplate power output after 25 years.

How much do solar panels cost on average? Most people will need to spend between \$16,500 and \$21,000 for solar panels, with the national average solar installation costing about \$19,000.. Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.
