Toolbox. Useful PC tune-up software offers file management tools to uninstall programs, wipe PC or hard drive, and destroy deleted files; Also, System Management tools to find memory-intensive background tasks, optimize Windows startup programs, scan network connections, and remove harmful software are available.

Power system protection study deals with precautionary measures to be taken to safeguard the power system during abnormal operating conditions which involves periodic fault studies followed by relay setting, checking and coordination studies. Power System Protection can be current graded or time graded or a combination of both.

The share of gas in the ALEX DIESEL System is on average up to 30% LPG or 50% CNG ch proportions of additional fuel guarantee the correct operating conditions of the engine and the entire system. Adding gas, which acts as a catalyst to the fuel mixture, allows the diesel to burn more efficiently, which is practically impossible in an ordinary diesel engine.

While our ALEX Personal Workspace is under construction, you still can access all of the ALEX Learning Resource templates! With the handy self-check feature, you'll be able to evaluate your work as you complete each component to ensure you are planning a high-quality learning experience for your students.
