Transmitters Series: WPC24-XL-KF Features  
Wireless Bridge Between Key Fob Switch & Control  
Relay Up To 1 Mile (LOS) Transmit/Receive  
Distance Weatherproof NEMA 4X Rated Enclosures  
Use To Control Pump, Valve, Motor, Gate o

Just the 2.4GHz isn't saying very much, as 2.4Ghz  
is also used by WiFi, Bluetooth, some Zigbee. All  
different kinds of encodings and protocols. ???  
Gerben. Commented Jun 10, 2017 at 15:31. Add a  
comment | RF remote control using VirtualWire on  
ATtiny85 running at 8MHz on internal oscillator. 2.

There are 2 switches, a side mounted system wide  
power switch and top mount momentary power  
switch. The side switch, when in the off position,  
completely powers off the remote. When in the on  
position the remote is still technically off, as you  
have to use the top momentary switch to turn the  
remote on and off. From APS documentation???

2.4 GHz Remote Control and a range of up to 1600ft, line of sight. Customization is easy, especially when it comes to our Panther series. Transmitters and receivers stand out for their ease of use and versatility.. Delivered in standard off the shelf configuration, with a variety of built-in operating modes and load selects or custom programmed to meet your specific requirements.

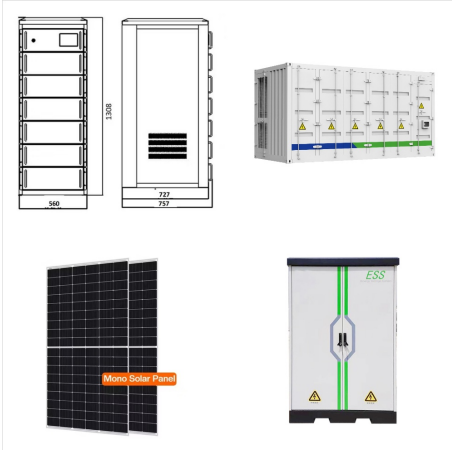

Yeah but you can just keep the remote in the background and just send commands to the ESP. The ESP mimics the button presses and then the remote sends the 2.4 GHz signal to whatever he's trying to control. That's my take on what he's saying anyway.

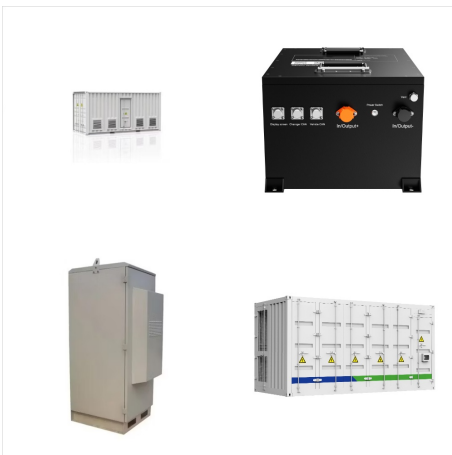

The Nanlink WS-RC-C2 2.4GHz Remote Control from is a multi-function wireless controller that is especially valuable for adjusting lights positioned at a distance or hung overhead. The remote can adjust the brightness, color temperature, hue, and saturation of Nanlite and Nanlux lights equipped with built-in 2.4ghz receivers from up to 32 feet (10m) away. Also, on compatible ???
