How much does a solar feed-in tariff cost in NSW?

It is a competitive market so electricity retailers do have an incentive to offer a reasonable feed-in tariff to win customers with solar panels installed. According to Energy NSW, the benchmark rate is 4.9 to 6.3 cents per kWhfor 2024/2025 in NSW. What retailer has the best solar feed-in tariff in NSW?

Does Alinta Energy offer solar?

A competitive solar feed-in tariff. The great news is that all Alinta Energy plans offer solar to eligible customers. And, whilst we don't install solar panels, we Instead focus on offering our customers the best combination of a competitive electricity offer and a competitive solar feed-in tariff.

Are feed-in tariffs still available in Australia?

State-mandated feed-in tariff incentives are no longer available to new solar customers in almost all of Australia's states and territories. Instead, rates are largely voluntary for electricity retailers in most states; they usually fall in the range of 6-15¢/kWh - generally lower than price of retail electricity purchased from the grid.

What are solar feed-in tariffs?

Solar feed-in tariffs are a payment that you receive from your chosen electricity supplier in exchange for any surplus clean energy that your solar panels feed back into the grid. There have been many changes to this legislation in New South Wales over the last few years.

Does a higher solar feed-in tariff mean a better deal?

A higher solar feed-in tariff rate from your electricity retailer does not necessarily mean a better overall deal - make sure that you consider each retail electricity plan as a whole. You can try our Solar-friendly Retail Plan Comparison Tool to get a more complete picture. At the moment, there is no mandatory minimum feed-in tariff
