However, proper maintenance is key to ensuring optimal performance and extending the lifespan of your lithium golf cart battery. In this comprehensive guide, we'll cover the basics of lithium golf cart battery maintenance to help you get the most out of your investment.

Sleep Mode works on a timer that resets to 0 when it sees a current draw in your customer's golf cart. Which happens when the battery is charging or being driven by the customer. The timer will always count until it eventually shuts off the battery. Your battery will be at 3.3v when the BMS senses no draw on your golf cart. Depending on the
