Supercapacitors are highly efficient at storing energy but differ from batteries in some important ways. They can charge much more quickly than a lithium-ion battery and don't suffer from the same levels of degradation in performance. But supercapacitors also release the power they store rapidly, making them less useful in devices such as

The TB65 Intelligent Flight Battery uses high-quality, high-energy cells and can be charged up to 400 cycles, reducing the cost of a single flight. Additionally, it has improved heat dissipation performance and an automatic heating system. Characteristics Value; Category: Batteries : Weight: 1.35 kg
