Total Power Group were contracted by T Clarke during the initial phases of the global COVID-19 pandemic to assist in the manufacture, delivery and installation of this complete LV package at the Exeter Hospital. The new temporary / permanent hospital had to be put together from design to completion within weeks. To assist with this we looked to

The Total Total Fertility Rate (TFR) is a standard demographic indicator that is used internationally to estimate the average number of children born per woman in a population. It is calculated by adding up all the age-specific fertility rates, multiplying this sum by five (the width of the age-group interval), and then dividing by 1,000.
