

"For about US\$50 million, Anguilla can have a robust renewable energy plant that we are paying for and that we own." According to Mr Hodge, ANGLEC is currently spending between \$40-\$93 million a year in diesel cost to supply electricity to the island.

It is through the combined efforts of these groups that Anglec is able to provide Anguilla with the generating capacity it needs to grow. Currently, there are 11 units in operation, with the capacity to generate 23 megawatts of electricity.

With over 50 years of expertise in renewable energy technology, our team of professionals offers industry-leading solutions nationwide. We prioritize quality, value, and future-proofing in our solutions, ensuring our clients' renewable energy systems perform optimally over time.

This project is a landmark development for Anguilla's future, and positions the island as one of the leaders in renewable energy throughout the region. Observers from other countries have also come to visit the new solar ???

This project is a landmark development for Anguilla's future, and positions the island as one of the leaders in renewable energy throughout the region. Observers from other countries have also come to visit the new solar plant.

Anguilla's vulnerability to the effects of global climate change is disproportionately high when compared to the country's very small contribution to generating greenhouse gases (GHGs) through consumption of fossil fuels. To some extent, Anguilla has the opportunity to address these challenges by implementing

At Green Ltd, we are committed to delivering exceptional renewable energy solutions that provide the highest quality and value for our clients' investment. With our unwavering commitment to engineering excellence, we ensure that our solutions surpass industry standards.
