

Who is aprovis Energy Systems GmbH?

Aprovis Energy Systems GmbH - Specialist In Exhaust Gas And Gas Treatment Technology. In a very short space of time, APROVIS has established itself as an innovative energy company on both the national and the international market. Our expertise lies in exhaust gas and gas treatment technology.

How many employees does aprovis energy systems have?

APROVIS Energy Systems has 5 employees across 2 locations. See insights on APROVIS Energy Systems including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

What products does aprovis offer?

APROVIS offers a wide range of products for gas and exhaust gas technology as well as special applications. Gas technology APROVIS FriCon cools and dehumidifies process gases of different types like from biogas plants, sewage treatment plants, landfills or other sources.

What are aprovis process gas heat exchangers?

APROVIS process gas heat exchangers are for cooling or heating gases from different sources. Applications from low to high temperatures and pressures up to 160 bar. Exhaust gas technology APROVIS exhaust gas heat exchangers use the waste heat from combined heat and power plants or other sources of flue gas to produce hot or overheated water.

What is aprovis high temperature heat exchanger & aprovis gland steam condenser?

APROVIS high-temperature heat exchangers use the heat and energy from flue gases from industrial processes. APROVIS gland steam condensers are used for large steam turbines to recover the gland steam and energy. System solutions from APROVIS APROVIS is a specialist for system solutions.

What makes aprovis a good company?

APROVIS's performance is based on a strong foundation: its employees. These motivated specialists include electrical engineers (who make up 15% of our workforce), designers (20%), engineers (40%) and order processing staff (15%).

At APROVIS, we provide professional support for your systems throughout their entire lifecycle. Teams of technicians know your project inside-out and will help you to optimise your plant. Spare parts are available quickly and ready for use on site too, thanks to our extensive service network.

APROVIS is a manufacturer of innovative technologies for gas pre-treatment and exhaust systems. Our expertise is in gas dehumidification and desulfurization as well as emission reduction of exhaust gases and heat recovery from CHP units. We are experts in specific individual components and compact system solutions. Find out more:

APROVIS combines the individual components to form a comprehensive system within the exhaust gas section. In detail, this means that: Silencers and SCR catalytic converters are combined so the noise and emission limits are met even in a reduced installation space.

Steam generators from APROVIS use the energy from combined heat and power plants' exhaust gas to generate steam. As steam generator systems, they are energy efficient in operation and can be put to universal use. The range for saturated or superheated steam extends from 1 to 25 bar overpressure, while the capacity is between 100 and 25,000 kg

APROVIS supplied the silencers for a STOR plant in the north of England with ten engines that had an output of 2 MW each within a very short space of time. STOR (short-term operating reserve) plants are mostly low-noise plants where a great deal of importance is attached to reducing noise emissions.

APROVIS's strength lies in the fact that it generates system solutions. We view the exhaust gas section and gas treatment as complex energy cycles where every detail and every process step is important. We operate in a market that ???
