Website: <https://arenko.group/> Arenko's market-leading software platform uses the power of automation and machine learning to identify and unlock the value of batteries and renewables. Arenko's technology optimises the technical and commercial performance of flexible assets in a?

Harnessing the power of our own software, Arenko trades and dispatches energy storage assets on behalf of clients to deliver enhanced financial returns. hello@arenko.group. Harmsworth House. 13-15 Bouverie St. EC4Y 8DP a?|

Arenko build, own and operate energy storage assets in the UK. Our projects manage transmission and distribution networks at a grid scale. We work with commercial and industrial energy users to store low cost and renewable energy and deliver it back at times of peak demand.

This was a particularly exciting day for Arenko since it marked the beta-launch of our fully automated dynamic bidding tool. The new platform brings 3 key changes: Negative pricing: Previously, the minimum price participants could bid was GBP0/MW/h. Now participants have the option to pay ESO to deliver a frequency service, i.e. price negatively

Arenko, a leading technology provider, building a sustainable future by enabling a zero-carbon grid worldwide, and Gresham House Energy Storage Fund ("Gresham") have agreed to expand the scope of their relationship with an asset management software deal covering some of the assets which are subject to Gresham's recently announced tolling agreement with a?

We are motivated at Arenko to use these skills to accelerate the development of sustainable energy systems. Our system is highly complex and its application broad. Our modular product suite offers proprietary, end to end automation software, powered by AI.

Arenko, a leading technology provider, building a sustainable future by enabling a zero-carbon grid worldwide, and Varco Energy ("Varco"), a pioneering UK-based battery storage asset owner and operator, have agreed a deal to expand the scope of their relationship with an asset management software deal across some of the longest duration battery assets in the [a?]

Summary. The Government response to the energy system "digital spine" feasibility study articulated a compelling vision for a digitalised and net-zero energy system based on widespread adoption of Data Sharing Infrastructure (DSI). DSI is defined as a minimum set of responsibilities, governance, functions and processes for secure, interoperable data sharing a?|
