

How much natural gas is produced in Argentina?

An average of 5.0 billion cubic feet per day(Bcf/d) of natural gas was produced in Argentina over the first nine months of 2024,5.2% more than the same period in 2023. In August,natural gas production averaged 5.4 Bcf/d,the most of any month in 21 years.

Why did Argentina's natural gas imports fall 47% in 2024?

Argentina's natural gas imports via pipeline fell by 47% in the first nine months of 2024 compared with the same period in 2023. The decline was largely because pipeline imports from Bolivia,which made up around half of Argentina's natural gas imports in 2023,ended in September 2024.

How much oil does Argentina produce per day?

In September 2024,production averaged 738,000 barrels per day(b/d) of crude oil in Argentina,15% more than in September 2023 and the most in any month since 2003. In September,oil produced in the Vaca Muerta formation accounted for 58% of the country's total output,according to SESCO.

In April, the Loma Blanca VI wind farm (100MW) invested and built by Goldwind in Argentina has been approved by the Argentine National Electricity Market Management Agency (CAMMESA) and entered the 20 years commercial operation period.
