During his time as governor of California, Arnold Schwarzenegger led the state in efforts to promote renewable energy. This video provides a look at California's eco-boom as it was happening in 2009. The company Nanosolar specializes in solar energy. They have turned aluminium foil into a revolutionary and extremely cheap form of solar cell

But the skeptics were wrong. And that's good, not only because the Million Solar Roofs initiative grew our solar power, but also because it created momentum for new goals to repower our state and the nation with renewable energy. Back in 2005, we had already been through an energy crisis and rolling blackouts.

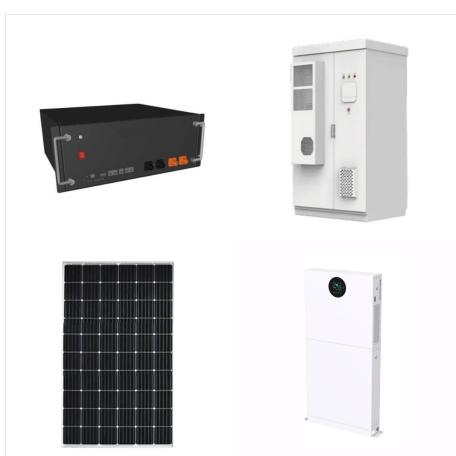

Two former governors were in Clovis today to celebrate renewable energy milestones. At Clovis Unified's Buchanan High School, Arnold Schwarzenegger and Jerry Brown were presented with the one-millionth solar panel to go on a roof in California. The panel in question was about the height of a door, and double the width.
