

Reliability is at the heart of ASEA Power Systems. We pride ourselves on delivering unparalleled reliability, ensuring that our customers have a seamless and secure connection to shore power no matter where their journey takes them. Our products are trusted by yacht owners, marinas, and shipyards worldwide.

At ASEA Power Systems, our engineering department collaborates closely with builders to create ideal shore power conversion solutions. Actively engaged during the product development process, we ensure our products align with the latest industry standards and technologies.

Reliability is at the heart of ASEA Power Systems. We pride ourselves on delivering unparalleled reliability, ensuring that our customers have a seamless and secure connection to shore power ???

ASEA Power Systems is the world leader in compact and lightweight power conversion equipment with power levels ranging from 8-1,000kVA and 3,500+ installations to date. With over 25 cabinet selections, ASEA Power has a solution for every new build or retrofit application along with a diverse range of air cooled and liquid cooled converters.

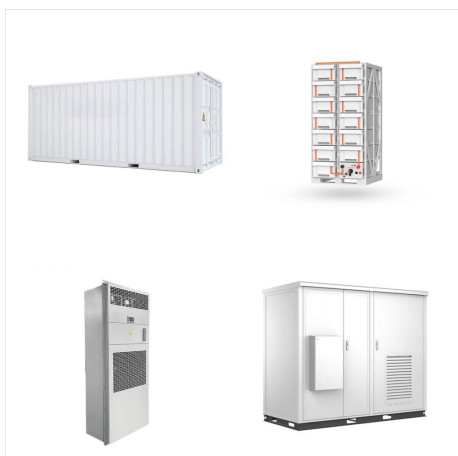

With fully-shielded isolation transformers, ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Their products range in power from 8 ??? 1000+ kVA and ???

ASEA shore power systems are a critical component of the maritime industry's transition towards sustainability. By enabling ships to connect to the electrical grid while at berth, these systems significantly reduce air and noise pollution, contributing to a cleaner and healthier environment for port cities and surrounding communities.

ASEA Power's extensive network of trusted service partners are strategically located at major ports worldwide to provide maintenance and emergency repairs whenever you need it. With 26 years of experience, we stand at the forefront of marine innovation and quality, supported by the largest network of authorized service providers in 127 countries.

Comprehensive Product Line ASEA Power Systems designs and manufactures power conversion equipment - phase, voltage and frequency - for Marine, Military and Commercial Applications. Our comprehensive product line ranges in power from 8kVA to 1000+kVA and provides both "Air Cooled" and "Liquid Cooled" Converters.

Who is Asea Power Systems? Our products are trusted by yacht owners, marinas, and shipyards worldwide. ASEA Power's broad network of trusted service providers is strategically located in main ports across the globe to provide the support you need when you need it.

With fully-shielded isolation transformers, ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Their products range in power from 8 ??? 1000+ kVA and come in both air and liquid cooled variations.
