But the unpredictable generation of renewable energy is not giving enough benefits to the operator/towercos. Considering these factors, energy storage integration with the telecom tower is a better prospect for the sustainable future. Energy storage application can provide 20% to 25% of annual savings in current fuel cost to the operators/towercos.

The Australian Energy Storage Alliance (AESA) is grateful for the opportunity to provide comments on the Australian Energy Market Commission's (AEMC) Five Minute Settlement Directions Paper (11 April 2017) (Directions Paper), on behalf of those in the AESA group.

Australian Energy Storage Alliance (AESA) is an information hub for the energy storage industry. We share the latest news, developments, case studies and deployment ready energy storage solutions. We engage and connect our ???
