Why do I need a battery backup?

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

What is an uninterruptable power supply (UPS)?

What is a UPS? An uninterruptable power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating power.

Why should you use an ups power supply?

While UPS power is great for avoiding a sudden shutdown, you should not expect it to power your equipment for long hours without additional electrical backup, such as a generator. The main purpose of a UPS is to give you time to switch to alternative power or properly shut down your machine. Benefits of an uninterruptible power supply.

Why should you buy a UPS battery backup?

Whether that's a blackout, brownout, or power surge, the best UPS battery backup will give you the time to save what you're doing and turn off your machine safely. Power surges and interruptions can be bad news for PC components, so what you're buying is peace of mind more than anything else.

Can a UPS battery backup cause a power outage?

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.
