

Does Freyr battery have a Giga America plant?

Freyr Battery has begun construction of its "Giga Arctic" factory in Norway, which is the template for its planned "Giga America" plant in Georgia. European lithium-ion battery upstart Freyr Battery is deepening its transatlantic ties, lured to the US by lucrative incentives that have unleashed a clean energy manufacturing renaissance.

Where are Freyr batteries made?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in Vaasa, Finland, and the United States. FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030.

What is Freyr battery?

FREYR Battery aims to provide industrial scale clean battery solutions to reduce global emissions. Listed on the New York Stock Exchange, FREYR's mission is to produce clean battery cells to accelerate the decarbonization of energy and transportation systems globally.

How much battery capacity will Freyr deliver?

FREYR intends to deliver up to 43 GWh of battery cell capacity by 2025, over 83 GWh of annual capacity by 2028 and over 200 GWh of annual capacity by 2030. To learn more about FREYR, please visit

Who is Freyr battery Norway?

FREYR Battery Norway. FREYR is a Norwegian Incorporated Company developing a lithium ion battery facility.

How will Freyr's new Gigafactories impact the EV industry?

It will speed up FREYR's progress towards its planned gigafactories, increasing the availability of high-performing and affordable EV battery solutions as well as energy storage systems, and thus accelerating the transformation of the automotive industry and electricity grids.
