

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.

How is Bahrain navigating the energy transition?

Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

Why is Bahrain reorganizing its oil & gas company?

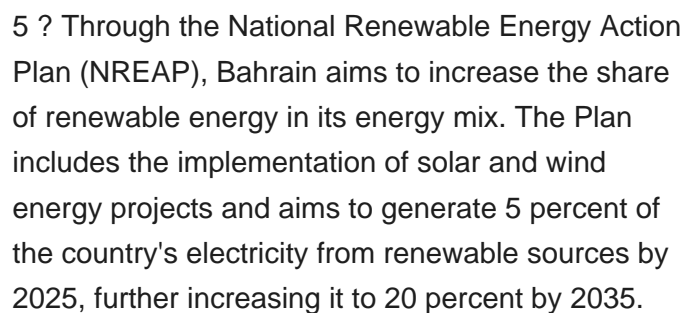

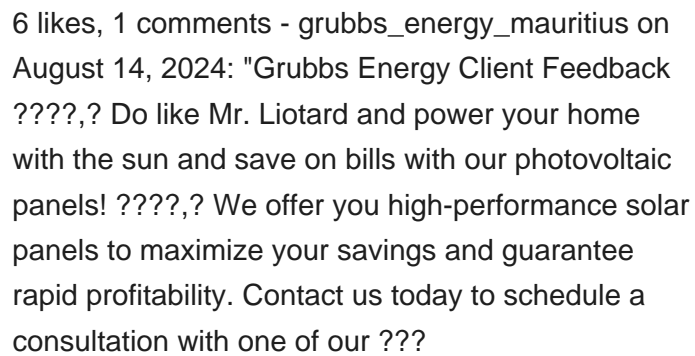

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Will Bahrain commercialise hydrocarbons by 2023?

Though there had been limited progress as of May 2022, the kingdom is hoping to commercialise the discovery by 2023. Under the Bahrain Economic Vision 2030 plan, the kingdom is striving to transition its economy away from a dependence on hydrocarbons.

Why is Bahrain investing in renewables?

Bahrain is also beginning to ramp up investment in renewables as it works towards its goal of reaching net-zero carbon emissions by 2060. The spike in oil prices in early 2022 could offer further incentive for Bahrain to expand its green energy capabilities. In September 2021 Bahrain announced plans to restructure its oil and gas industry.
