Installing solar panels in your home is an excellent way to save money while also helping the environment. However, if you want to reap the full benefits, you must also incorporate an off-grid home battery system.

Store. Manage. Control. Manage your energy sources to intelligently support household consumption and to decrease your reliance on the grid. Manage your energy consumption to offset peak rates, lower your electric bill, and take full advantage of your solar system.

With the FranklinWH app, homeowners can manage your Franklin Home Power (FHP) system anytime, anywhere. The FranklinWH app monitors your home electricity consumption 24 hours a day, tracking solar, grid, battery and generator supply and home consumption. It provides usage statistics for time periods including year, month and day.

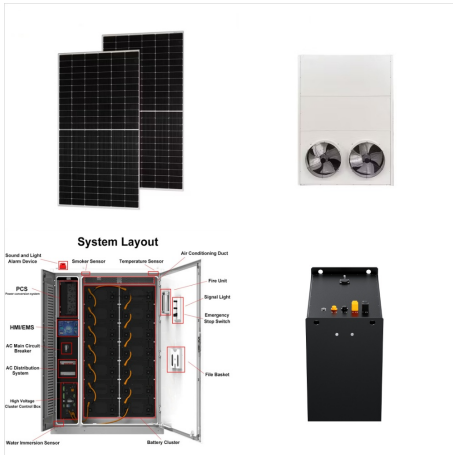

So, what about the "WH" after Franklin? As shouldn't be a surprise, coming from a company focused on R& D, it's the brainchild of a bunch of tech geeks ??? our founders. "WH" initially stood for "watt-hour," using the unit of energy to reflect the company's mission of creating optimized home energy management systems.

"I would say Franklin is the best battery currently available in the market. It's a 15kWh battery that's marketed as a 13.6kWh battery (the 1.4kWh is dedicated to black start) plus it has a ???

Franklin Home Power goes well beyond the demand for safe, reliable back-up to optimise daily household energy management, bringing you whole-home energy independence. The core FHP components are the aGate intelligent controller, the aPower batteries, and the FranklinWH App. Key components. The aGate

Generator rated power: Refer to the value on the generator name plate. Best power duty: Set the best duty efficiency point of the generator (70% by default). Please refer to the generator manual or consult the generator supplier for the optimal setting. Alarm delay after start failure: Set the delay period for the generator to be started. If generator startup fails, the system will push a
