

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

Located between Hawaii and Australia, the 500 kW on-grid solar rooftop project and a 2 MWh battery energy storage system (BESS) installed by Tuvalu Electricity Corporation in the capital, Funafuti, were recently commissioned by the Philippines-headquartered Asian Development Bank (ADB).

# BATTERIES SOLAR STORAGE TUVALU

The grant ADB is providing will fund the installation of rooftop solar panel and battery storage systems in Funafuti and ground-mounted solar power systems in the outer islands of Nukufetau, Nukulaelae, and Nui.

Infratec is currently delivering a \$NZ8.4 million Solar PV facility and battery energy storage system on Funafuti, with the Tuvalu Electricity Corporation. The project, due for completion late 2020, will include 770 kW of Solar PV and at ???

# BATTERIES SOLAR STORAGE TUVALU

Tuvalu, an island nation midway between Hawaii and Australia, has commissioned a new solar-plus-storage project with the ADB, featuring a 500 kW, on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti.

ADB and the Government of Tuvalu commissioned 500 kilowatt on-grid solar rooftops in Funafuti and a 2 megawatt-hour battery energy storage system that will provide clean and reliable electricity supply to the country's capital and help achieve the government's ambitious renewable energy targets.

Tuvalu, an island country midway between Hawaii and Australia, has commissioned a new solar and storage project with the ADB, featuring a 500 kW on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti.

The Asian Development Bank (ADB) and the Government of Tuvalu have officially launched a 500 kilowatt solar rooftop system in Funafuti, along with a 2 megawatt-hour battery energy storage system (BESS). This project will provide clean and reliable electricity to Tuvalu's capital and help the country meet its renewable energy goals.
