The power cord is plenty long, about 6 feet. I tested the battery life with a 25 watt oscillating fan, and it was 2 1/2 hours before it started beeping, another 10 minutes before it shut down. One can probably do the math, assuming that a fully equipped desktop is 200 watts and monitor maybe 50 watts, totaling 10 times the wattage of my fan

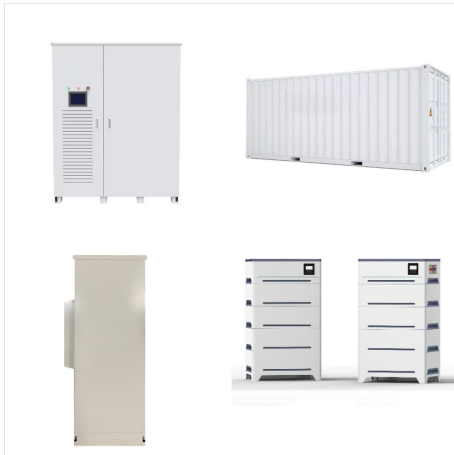

Additionally, battery backup power can provide a sense of security and peace of mind, keeping essential lights and security systems running throughout the night. On the other hand, it is neat, and you don't end up running extension cords across the house to power the TV and lights. At the end of the day, it really comes down to personal
