

The so-called Mouila photovoltaic (PV) project in Doubou, Ngounie province, will mark the Turkish company's first investment in Gabon. Estimated at EUR 27 million (USD 31.7m), it is set to be completed in 12 months.

With a capacity of 30 megawatts, this plant is equipped with a solar tracking device (or solar tracker) and a battery electrical energy storage system, is a major step forward for Gabon's ???

The Ay?m? Solar Power Station is a proposed 120 megawatts solar power plant in Gabon. The power station is under development by Solen, an independent power producer (IPP). The solar farm will be developed in two phases of 60 megawatts each. The energy generated at this power station is expected to be sold to the Energy and Water Company of Gabon (Soci?t? d'Energie et d'Eau du Gabon) (SEEG), for distribution in Libreville, the capital city of the county and its surrou???

The dubbed "Ay?m? Plaine solar photovoltaic power plant will be located some thirty kilometres from the capital Libreville and spread over a 251 hectare site. Phase one of the project will see Solen SA Gabon install solar ???

In its second phase, the project will install an additional 60 MWp of solar photovoltaic panels, also equipped with a 15-hour battery energy storage system. This will form a 120 MWp solar power plant spread over a 251 hectare ???
