

The British Virgin Islands (BVI) are a beautiful chain of islands located in the Caribbean Sea, known for their pristine beaches, turquoise waters, and laid-back island lifestyle. The islands are a popular destination for sailing and yachting enthusiasts, with over 60 islands and cays to explore.

The Jakiper 48V Server Rack Battery contains the latest LiFePO4 lithium cells, which means it combines exceptional performance with a long-lasting lifespan. One of the things that sets this deep-cycle battery apart is the fact that it offers truly outstanding value. Typically, you would expect to pay far more for a battery of this quality.

Work has begun on Anegada's Hybrid Renewable Energy & Battery Storage System in the British Virgin Islands (BVI), which, upon completion in November of this year, would harness solar energy to power the island of Anegada.

BATTERY SERVER BRITISH VIRGIN ISLANDS

The server rack LiFePO4 battery is a 48V 100Ah lithium ion battery for solar system, consisting of 16 identical LiFePO4 cells connected in series (3.2V/cell). It's the ideal solution for residential and commercial/industrial energy storage. The 5.12kWh can instead be connected in parallel (max).

Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date. The announcement by the Government of the Virgin Islands on 29 December, 2022, said the project combining solar PV and a battery energy storage system has a combined capacity of 2.1MW.

BATTERY SERVER BRITISH VIRGIN ISLANDS

ATEC BVI facilitates the transition to renewable energy in the British Virgin Islands and the wider Caribbean region. We are local leaders and pioneers in the development of the micro-grid energy production field.

Located to the west of the British Virgin Islands, the Virgin Islands is a set of islands located off the coast of Florida in the Caribbean Sea. The US government considers it to be a sovereign state, but it falls under the jurisdiction of the US. It has a population of 105k people and a density of almost 303 people per square mile.

The longer-term goal is for us to get to around 70-80 percent renewable energy across all of the Virgin Islands, and this is a major step forward. This project will reduce diesel produced electricity on Anegada by 90-95 percent.
