Whether you are assembling a very quiet system, upgrading your PC, or building a gaming system with a powerful high-end GPU: Pure Power 11 FM 550W offers the best combination of features at a

BE QUIET 300W SYSTEM POWER B8

And I'm fully aware that a 300 watt PSU at 100% load consumes more than 300 watt. That's the whole point about efficiency, to minimize the loss of the power transformation inside the PSU. The reason go to with a 300 watt is that it's enough to run the whole system, especially at start up, where it could consumes more or less the most.
