VERY QUIET OPERATION. High-quality fan for low noise. System Power 10 650W is equipped with a temperature-controlled 120mm quality fan. It provides the low noise operation that be quiet! is famous for, offering remarkable quietness at this price-level. HIGH PERFORMANCE FOR YOUR SYSTEM. Proven reliability for CPU and GPU. System Power 10 650W

The Be Quiet System Power 10 650W is reliable and quiet. It is made for users who want good performance and low price. It has many features, such as a fan that changes speed with the heat and a low power use when idle. The System Power 10 650W is a great choice for basic systems. High-Quality Fan for Whisper-Quiet Operation

System Power 10 is specially designed with the price-conscious PC builder in mind that does not want to dispense on reliability and quiet operation. Featuring up to 850W System Power 10 ???

BE QUIET SYSTEM POWER 10 650W **SOLAR**

System Power 10 series are the PSU of choice for price-conscious PC builders that do not want to dispense on reliability and quietness. be quiet System Power 10 650W 80Plus Bronze PSU. \$ 68.51. be quiet Pure Power 12 M 750W 80+ Gold Fully Modular ATX3.0 PSU. \$ 115.26.

System Power 10 series is Tier C, low end, it would probably be fine but I wouldn't really recommend cheaping out on a power supply because cheaper units typically aren't that reliable. If you want something reliable that isn't too expensive, my suggestions are: Corsair RM750e (2023) EVGA SuperNova GT 750. Super Flower Leadex III Gold 750

The PSU isn't particularly high quality but it does at least list over power protections on the product page, which means it should automatically shut off if it goes over 450W. A 3060 and 5600X won't draw more than 400, so unless you have a bunch of hard drives, LEDs and fans it's unlikely you'll ever even see 400W.

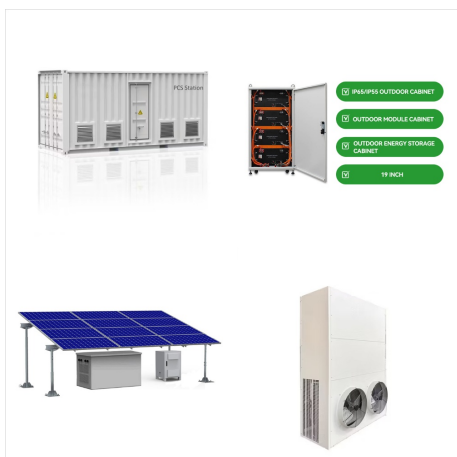

be quiet! ist ein Premium-Markenhersteller in den Bereichen Stromversorgung, Geh?usen und K?hlung von Desktop-PCs.
