

be quiet! System Power 9 CM 700W

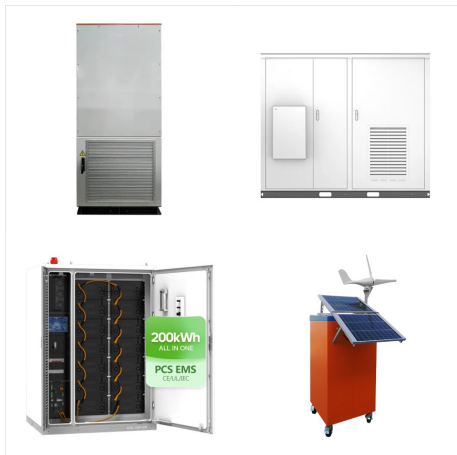

Be quiet! System Power 9 CM 700W offers renowned be quiet! reliability and quietness for price-conscious PC builders. Rock-solid stability with 2 strong 12V-rails; DC-to-DC technology for tight voltage regulation; 2 PCIe connectors for powerful GPUs; Temperature-controlled 120mm fan reduces system noise; Stand-by drain of less than 0.15 watts

be quiet! System Power 9 500W offers renowned be quiet! reliability and quietness for price-conscious PC builders. Rock-solid stability with 2 strong 12V-rails; DC-to-DC technology for tight voltage regulation; 2 PCIe connectors for powerful GPUs; Temperature-controlled 120mm fan reduces system noise; Stand-by drain of less than 0.15 watts

Yes, the PSUs from Bequiet are pretty good. I have the same Power Supply myself, but the 400W variant. They're barely audible while still being very reliable. If you aren't sure if you have enough wattage for your system you can check on bequiet's website. They have a PSU calculator which also suggests their PSUs based in your build.

We received the 600W Pure Power 9 (L9-CM-600W) for testing. It sports two +12V rails, and be quiet! claims the PSU is silent even under full load. Its fan has a max speed of 1800 RPM, so obviously the control circuit needs to stay conservative, else it wouldn't facilitate low noise output under high operating temperatures.

Características: Funcionamiento muy silencioso: System Power 9 de 700W está equipada con un ventilador de 120 mm con control de temperatura. Le ofrece el famoso funcionamiento silencioso de be quiet! incorporado a un sistema básico. Certificación 80 Plus Bronze: La certificación 80 PLUS Bronze es una prueba convincente del funcionamiento eficiente y con ahorro de ???
