

China, with its burgeoning energy needs, is the world's leader in the use of solar hot water systems. That presence was felt at the 2005 Solar World Congress with a few solar hot water product offerings from the country. Among these were the evacuated solar thermal hot water heating systems from Beijing Sunda Solar Energy Technology. Each system includes a ???

Cost: China visit 1 week/person: ca. 10.000,- DM 4. Selection of potential partner, technical or other cooperation if feasible

The project had been planned and realized by Beijing Solar Energy Research Institute (BSERI). The solar combined system is installed at No.10 Dayangfang in Chaoyang District on top of the Sunda office building. It mainly includes 100KW solar photovoltaic and 360KW solar air- conditioning systems.

Beijing Sunda Solar Energy Technology Co., No. 3 Huayan Road, Haidian District 100083 Beijing City People's Republic of China Seido 2-16 KT05 02 Complete test according to DIN EN 12975-1,2 "Thermal solar systems and components ??? Solar Collectors" This test report contains the results of the preliminary test report

When planning to design a solar water heating system the following data has to be known: The number of people and hot water consumption per person/year. The local solar irradiation and air temperature in months and hours of sunshine per year . The deviation from the north/south line to correct the orientation of the solar collector

In order to better meet this large demand, Beijing Solar Energy Research Institute (BSERI) in co-operation with Sunda has conducted extensive research in this area. A demonstration system with 100kW cooling capacity was successfully designed and set up in Shandong Province, China, and started working in September 1999.

Contacto de fabricante. Tect?nica es el canal por el que puedes contactar directamente con el fabricante para pedir m?s informaci?n sobre sus productos, aclarar dudas sobre la puesta en obra, solicitar presupuestos, muestras o hacer un encargo.

Tax Reduction for Renewable Energy Equipment. Investment costs in renewable end-use technology are deductible from the income tax. The limit to the deduction set in 2000 was PTE 50,000. From 1999, investors in equipment using solar energy are also entitled to claim a depreciation rate of 25%. Tax Incentives

It commits \$75.3 million to fund a series of trials aiming to gauge the benefits of concerted use of solar and energy efficient technologies combined with interval metering. In this program distributed solar technologies such as solar thermal, energy efficiency, load management, smart meters and cost-reflective pricing will combine in large

News: From March 7 to 10, 2019, Mr. Wang Jianwei, the president of China National Huachen Energy Holding Group(SUNDA's Group Corp.) and Ms. Li Wei, the president of Beijing Sunda Solar were invited to visit Malta to attend the business negotiation conference for Malta tops Europe's economic growth projections by the President of the Republic of Malt.

The first phase of the program, specific to individual solar hot water heaters, was extended to collective applications of solar water heating. The objective is to reach 112 000 m² per year of collector surfaces installed and a total of 330 000 m² installed between 2000 and 2006.
