

Are solar panels a good investment in Belgium?

As soon as you install your solar panels, you'll notice a reduction in your electricity bill. Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!).

Where can I install solar panels in Belgium?

For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality. There are several companies active in Belgium that install solar panels.

Can solar panels be installed in Brussels?

In Brussels additional regulations are added: the solar panels can not be visible from a public space and they do not protrude more than 30cm off the roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

How much do solar panels cost?

The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak (Wp), although the exact price depends on a number of criteria:

What types of solar panels do wholesale suppliers supply?
