

What is a solar starter kit?

Starter Kits are designed with people who are new to solar in mind and include lightweight, easy to handle solar panels rated for systems between 50 and 200 watts. They include highly efficient monocrystalline panels, which are great on applications where you have limited roof space. What's included in solar panel kits? What do I still need to buy?

Are solar panels a good investment in Belgium?

As soon as you install your solar panels, you'll notice a reduction in your electricity bill. Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!).

What are Renogy solar panel kits?

Renogy has a range of different solar panel kits for those interested in installing solar on their own. Starter Kits are designed with people who are new to solar in mind and include lightweight, easy to handle solar panels rated for systems between 50 and 200 watts.

What does a solar panel kit include?

Renogy's solar panel kits include solar panels, charge controller, wiring and cables, and mounting hardware. You'll need to purchase an inverter and deep cycle batteries in order to complete your system. Should I purchase roof mounted panels or a folding panel?

Why should you buy a solar panel kit?

Solar panel kits make it easy to ensure that you have all the parts you need and that they will safely and efficiently work together. Renogy has a range of different solar panel kits for those interested in installing solar on their own.
