

Why has Belize invested in energy?

Belize has invested in energy for the purpose of strengthening and stabilizing its energy sector over the last 20 years. The country has made investments in hydropower, biomass, solar, and liquefied petroleum gas (LPG) to ensure energy security.

What is the National Energy Plan for Belize?

In 2003, a one-year project entitled Formulation for a National Energy Plan for Belize was implemented by the Public Utilities Commission, funded by the United Nations Development Fund. This project developed a comprehensive National Energy Policy to promote environmentally sound, safe, reliable, and affordable energy.

Why is Belize not connected to the National Grid?

Significant portions of Belize, including tourist hotspots such as the cayes and eco-tourism lodges in the rainforest, are not connected to the national grid. Belize remains a net-importer of electricity from Mexico, making energy imports expensive and unpredictable.

Why should we combine E3/DC & Hager energy management systems?

Combining E3/DC and our Hager energy management systems under the roof of our new Hager Energy business unit means we're ready to take on one of the greatest challenges of the energy transition: storage and distribution of renewables. Global warming. Temperatures on our planets are rising due to CO2 emissions.

Does Belize use solar power?

Belize uses solar power on a smaller scale, with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize, along with Belize Electricity Limited (BEL), intends to launch a pilot project introducing electric vehicles.

What are the four main sources of energy in Belize?

Energy in Belize is based on four main sources: imported fossil fuels, biomass, hydro, and imported electricity. (2003 data from Launchpad Consulting).
