

Will Belize Electricity compensate you for excess solar energy?

The hope is that through regulations, Belize Electricity Ltd will have to compensate you for excess solar energy flowing to the grid during the day and off-set it against the electricity you are drawing from the grid at night; however, the reality today is the opposite.

How much can a power saver save you?

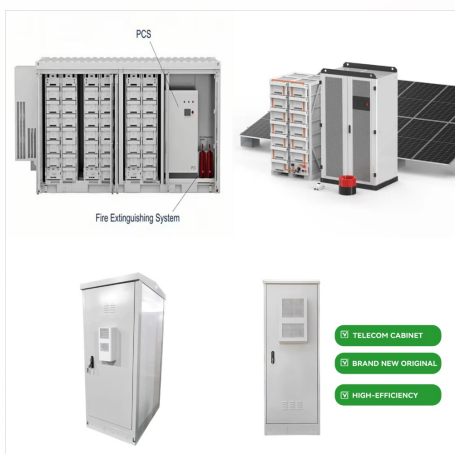

With the average energy usage of an average American home standing at 893 kWh and electricity prices in the country ranging between 10 and 30 cents per kWh, using a power saver can shave off several centavos from your electricity expenses each month. The savings may not be much, but in time, the amount can add up. How Much Can You Actually Save?

How effective are energy savers?

Through the years, technological innovations have improved the effectiveness of the device. Manufacturers claim that an energy saver can reduce consumption by 25 to 40 percent for older models. Newer and more efficient ones can boost your energy-saving goals with 80 to 90 percent effectiveness.

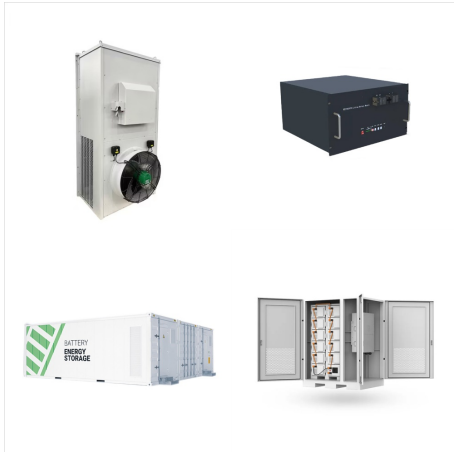

What does the Belize Chamber do?

Founded in 1920, the Chamber has been consistently championing the causes of its private sector constituency and considers among its primary objectives the social and economic development of Belize through the development of all sectors of industry, commerce and services.
