Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems. However, the amount of power generated by a solar energy system at a particular site depends on how much of the sun's energy reaches it, and the size of the system itself.

Founded in 2004, Ecotech Solar is Whatcom County's only locally owned and operated solar contractor. Drawing on projects and experience from eleven countries on five continents, Ecotech designs and installs premium solar electric systems using locally-made equipment and provides valuable consulting services.
