This project is a significant achievement for Saturn Power, BELCO, the government and the people of Bermuda, as it is the country's first utility-scale, renewable energy facility. Using over 20,000 photovoltaic solar panels, Saturn Power developed this 6 MW AC solar photovoltaic (PV) power generation facility, at "The Finger" on St. David

A new solar power farm installed on a peninsula at LF Wade International Airport has already proved strong enough to survive a hurricane. The 24,000 solar panels covering almost 19 acres on land known as "The Finger" were partially in place when Hurricane Humberto struck last September, but they survived undamaged. A solar electricity system installed by BE Solar can provide clean power for up to 75% less than current electricity rates. Our team provides the most robust and highest quality solar panels, with safe and reliable microinverters and tough, leak-free attachments that are designed to withstand the unique environmental conditions of Bermuda.

For homeowners who want to help cut back on greenhouse gas emissions, going solar is a straightforward choice, especially since Bermuda Dunes produces a high amount of carbon dioxide emissions from its energy generation fact, if you adopt solar power, you could expect to reduce your carbon dioxide emissions by about 100 pounds each year.

The Bermuda Solar Oxygenator Solar Air Pump is a great choice for amateur pond keepers who are more interested in pondlife than complex wiring. It's pretty much ready to go out of the box - just stake the solar panel into the ground and connect it to the pump with the 3m power cable before dropping the airstones into the water. Please note, the

Good day to all members of the media and the listening public.
