

## Why is FPSC partnering with SolEnergy Systems Inc?

This initiative reflects FPSC's commitment to sustainable energy solutions, with Solenergy Systems Inc contributing its expertise in engineering, procurement, and construction. The projected annual yield of 1314.97 megawatt-hours (MWh) underscores the anticipated efficiency of the solar power system in harnessing renewable energy.

## What is SolEnergy's new home base?

Solenergy's new home base will seamlessly integrate PV modules to its entire roof structure. The PV components will deliver mutually complementing benefits such as temperature regulation inside the office space and electricity production.

## Why should you choose SolEnergy?

Weatherproofing features from the mounting system will provide excellent durability and protection from the elements. Solenergy's own home base's roof will have PV modules integrated into it, which will not only provide power but also indoor functions like temperature control.
