

What is the future of Bess in Latin America?

To provide a view of what is to come, AMI breaks down the status and opportunities of BESS in main Latin American markets. Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators.

Does Peru have a Bess regulation?

Peru has no existing BESS regulation and is currently evaluating how to move forward with battery storage projects. In fact, in January 2024, Peru's energy and mining investment regulator, Osinergmin, opened a request for a proposal for a study on energy storage.

What is Bess & how does it work?

BESS is not defined by law but rather by the market. Storage projects must register as an active plant ("central electrica") and be represented by a market participant, in this case, a generator. Hence, they pay transmission and other charges, making stand-alone projects unprofitable. However, the next elected President may change that...

Will a PPA add Bess in Puerto Rico?

Under ASAP, IPPs with existing PPAs with Puerto Rico's Power Authority (PREPA) would add BESS at their locations "on an accelerated basis," leading to an estimated 380 MW of additional contracted BESS capacity by 2026. 3 Peru has no existing BESS regulation and is currently evaluating how to move forward with battery storage projects.

Does Mexico have a Bess market?

Mexico's FTM BESS market is practically nonexistent. BESS is not defined by law but rather by the market. Storage projects must register as an active plant ("central electrica") and be represented by a market participant, in this case, a generator. Hence, they pay transmission and other charges, making stand-alone projects unprofitable.

What is the Bess consortium?

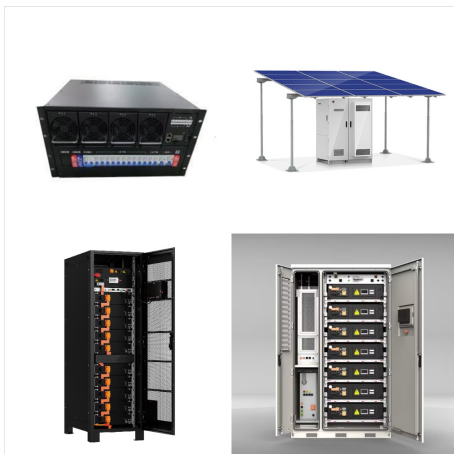

The BESS Consortium is a multi-stakeholder partnership set up to ensure these BESS benefits transform energy systems across low- and middle-income countries (LMICs). The Consortium is on track to meet its target of securing 5 GW of BESS commitments by the end of 2024 and deploying these by the end of 2027.
