I have a 7.2kw MPP Solar AIO. I have to say I'm very satisfied with it. Now, it hasn't all been peaches and cream. Within the first days of installing the system it started acting really weird and wasn't able to handle 3kw loads even though the Inverter is supposed to handle 10kw peaks.

Solar panels generate DC power, while household appliances operate on AC power, as supplied by the electricity grid. The primary role of a solar inverter is to convert DC solar power to AC power. The solar inverter is one of the most important parts of a solar system and is often overlooked by those looking to buy solar energy.
